01 Ex ante
Select suitable provider
L1 Identity and trust
Credentials; evaluation history
L2 Discovery and Capability
Capabilities; invocation conditions
Selection Conditions
Evaluate the present configuration
Check joint task feasibility
Assurance Boundary
Identity alone does not establish current competence.
Relevance alone does not establish a feasible composition.
02 Interim
Execute delegated transaction
L3 Orchestration and Delegation
Tasks; handoffs; dependencies
L4 Authority
Mandates; scope; budget state
L5 Payment and Settlement
Authorization and settlement
L6 Lifecycle
Orders; continuing obligations
L7 Observation/Intervention
Observation; intervention points
Assurance Boundary
Permission alone does not establish alignment with the user's objective.
Completed calls need not fulfill the composed obligation.
Observation does not ensure control.
03 Ex post
Assess performance and remedy
L5 Payment and Settlement
Transfer and settlement evidence
L6 Lifecycle
Fulfillment and order changes
L8 Disputes and Enforcement
Decisions and executable relief
Acceptance Chain
Obligation / evidence / decision
Specify evaluator and coverage
Assurance Boundary
Payment alone does not establish accepted performance.
Truthful evidence can be selective.
Refunds can leave other losses.
01 Evidence Selection
Literature
Retrieve, consolidate, screen
Assess eligibility and relevance
Retain source-record evidence
Official Specifications
Select releases or snapshots
Keep the inspected version
02 Assurance Analysis
Scholarly Mechanisms
Mechanisms and assumptions
Formal / experimental evidence
Distinguish evidence levels
Protocol Guarantees
Objects, scope, enforcement
Version and trust conditions
03 Synthesis
Cross-function Boundaries
Compare assurances and limits
Link authority and obligations
Identify unresolved connections
Conditional Models
Review timing; selective evidence
